The above timetable shows the schedule for live online teaching. We are aware families at home may have one device but more than one child or multiple live streaming devices may cause broadband failures, therefore our timetabling overcomes these issues by using a rota.

**KS1** children should aim to work for 3hrs per weekday at home on the tasks set by the class-teacher. This will comprise of a mix of live teaching and other specified materials. The 3hrs does not need to be continuous and may be split into several chunks of manageable activity, determined by the child's concentration capacity.

**KS2** children should aim to work for 4hrs per weekday at home on the tasks set by the class-teacher. This will comprise of a mix of live teaching and other specified materials. The 4hrs does not need to be continuous and may be split into several chunks of manageable activity, determined by the child's concentration capacity.

Each child has been set up on Google Classroom to facilitate live teaching.

We understand home life may not be completely conducive to online teaching/learning, please contact school if you are having difficulties so a bespoke package can be arranged.

This is very new to us and as with lots of technical things, there may be problems; please bear with us.
