

XT-EPDM TAPE – Non adhesive

Technical specification

Substrate	Ethyl Polymer Diene Monomer (EPDM)
Dimensions	60, 80, 100, 120mm std (other widths on request)
Roll length	20m
Thickness	0.75mm (-5%/+10%)

Performance information

Reaction to fire	E (Tested to EN 13501-1)
Watertightness (2kPa – EN 1928)	Pass
Water vapour permeability (EN 1931)	50,000
Impact resistance (EN 12691)	NPD
Tensile strength (EN 12311-2)	≥ 7MPa
Joint shear resistance (EN 12316-2)	NPD
Elongation (EN 12311-2)	≥ 300%
Tear resistance (EN 12310-2)	≥ 10N
Durability against ageing (EN 1296/EN 1931)	Pass

XT-EPDM TAPE – Non adhesive

Properties

Very good resistance to weather conditions, UV and aging.
Very good long-term weathertightness
Highly elastic and putrefaction resistant
Recyclable
Solvent free
Sound deadening properties
Product isolating properties to keep dissimilar products from reacting with each other, such as concrete and aluminium.
Helps to act as a thermal break in construction applications
